

LINGO™

Seed Funding Pitch

You scroll **more**, but feel **less** connected

THE 15 YEAR OLD MODEL

Engineered for Isolation

The old systems amplify comparison and noise, not connection.

The Popularity Trap

Social platforms today are built on a popularity graph (followers/following).

Echo Chambers & Anxiety

This system favours a select few, creates echo chambers, and fosters comparison and anxiety.

THE SHIFT

Real Relationships, Not Endless Feeds

The next generation wants depth, not noise.

A Changing World

The world has fundamentally changed (pandemic, geopolitics, AI boom, attention economy).

Deeper Connections

People are looking for deeper, more meaningful connections and information, not just fleeting entertainment.

And you are **losing hours** every week just switching apps

A **£30.7B Opportunity** Hidden in Plain Sight

The convergence of social interaction and messaging impacts **4.5 billion people globally**.
This massive, fragmented market offers an unparalleled opportunity for a unified, **AI-enhanced solution**.

Why this is a massive market opportunity?

Messaging is Core

4.5 billion people rely on messaging apps daily. The direct, intimate connections between them drive high engagement and retention.

AI as a Transformative Layer

AI is a necessity, revolutionising user interaction with content and services. It personalises experiences, automates tasks, and enhances discovery.

Echo Chambers & Anxiety

This system favours a select few, creates echo chambers, and fosters comparison and anxiety.

Untapped Potential in Emerging Markets

Mobile-first emerging markets represent the fastest-growing user bases, demanding inclusive, efficient, and localised solutions.

Why now?

1 Peak AI Readiness

Users demand AI-driven features; the technology is mature, affordable, and expected.

2 Messaging Fatigue

Users juggle multiple messaging apps. A consolidated, smarter solution is highly sought after.

3 Demand for Authentic Connections

Growing desire for genuine interactions, community building, and shared interests beyond superficial feeds.

World's First Social AI SuperApp

 **Calls/Contacts**

 **Chats (1-1 & Groups)**

 **Tribe**
Meet people in your city who share your interests through events, pop-ups and meaningful conversations beyond your existing network.

 **Lexi**
Learn languages and explore cultures, plan your trips and connect with people in the places you are visiting.

 **Nova**
Watch content made specifically for you, and discover an e-commerce platform that connects your real needs with the right businesses, not just what is trending.

One
Platform

Two
Innovations

Be proudly **you**

Chat and speak your way, in **your language**.

They **receive**
in theirs.

Your **original**
stays visible.

Lingo **solves** communication barriers.

Be truly **seen**

The Intent Algorithm understands your intent, tone, interests, your questions, and your emotional context across everything you do in Lingo.

So whether you're:

- meeting people in **Tribe**
- discovering in **Nova**
- learning in **Lexi**
- or getting personalised support in **Spark**

Lingo gives you what actually fits you, not a feed.

Lingo solves connection barriers.

Built **Quietly.** Built **Right.**

Stealth Mode by Design

Operating quietly and strategically until launch, refining every feature with precision and intent.

£55,016.39 in R&D Grants

Every penny reinvested into Lingo, from cutting-edge AI research to rigorous UX testing and comprehensive product validation, ensuring a superior user experience.

Built with **Intention**

Disciplined growth. No noise. No shortcuts. This deliberate approach lays a stronger, more resilient foundation for a successful and impactful launch.

Bootstrapped

100% self-funded to date, maintaining full control, focus, and alignment with our foundational vision and user-centric philosophy.

Raising **£3.1M** to Launch the **Future of Social**

This funding will enable complete product development, scale engineering, execute multi-country launches, support **5 million MAU** within **12 months**.

Use of Funds

£1.45M

Team Expansion

£650K

Technical Development

£390K

Go-to-market launch and user acquisition in India, Nigeria, Brazil, Egypt and Indonesia

Investment Terms

Offering
10% equity

Pre-money valuation
£27.9M

Bootstrap investment to date
£274,434.13

Additional highlights
